ABOUT STOREBRAND

Storebrand Asset Management is Norway's largest private asset manager and a specialist in sustainable investing. Sustainability is integral to Storebrand's business and our ESG analysis, which aligns with the UN's Sustainability Development Goals, is fully integrated into the investment processes for all assets under management. Our long-term vision for the year 2050 is a world where nine billion people live well, within the earth's natural limits, and we believe that the companies which contribute to solving society's problems in a sustainable way will also be the most profitable in the long run.

INVESTMENT COMMENTARY

Storebrand Global Solutions is an actively managed global equity portfolio investing in sustainable impact companies. The strategy is fossil-free and seeks to generate alpha by identifying businesses from developed and emerging markets that provide solutions to help achieve the UN's Sustainable Development Goals. The portfolio is centred on four complimentary investment themes; climate solutions, sustainable cities, responsible consumption and empowerment.

- Of the four portfolio themes, Sustainable Cities was the top performer over the quarter, led by BYD Co, Zhuzhou and Johnson Controls.
- Within Responsible Consumption, Nvidia's strong performance continued – the US software company's share price rose 50% in Q2 – and we remain excited about its activities in combining artificial intelligence and simulation with health care. In the short-term, its potential deal with Softbank for Arm will dominate headlines.
- It is encouraging to see our new cybersecurity holdings are performing strongly and that the sub-theme which we integrated within Empowerment at the end of last year is receiving increased attention internationally.
- Climate solutions stocks rebounded during the period, particularly in June, although oil stocks and those in related industries have continued to perform strongly which detracted from the fund's relative returns.
- In terms of portfolio activity, we exited from City Developments Ltd and Proto Labs, and entered into a position in Xylem, the US-based water technology provider.
